

AirPatrol

WiFi

**CONTROL YOUR
AIR CONDITIONER
WITH MOBILE!**

AirPatrol WiFi connects to your home WiFi network and lets you control your heat pump or air conditioner from anywhere using your smartphone!

It enables you to adjust the mode, room temperature and fan speed of a heat pump.

Save Money, Gain Comfort!

SAVES MONEY

Cool or heat your house only for the period when you're at home and turn it off when no one is around.

MAKES LIFE COMFORTABLE

Never again arrive to a cold home. Adjust the room temperature to perfection prior to arrival or set up automatic time cues.

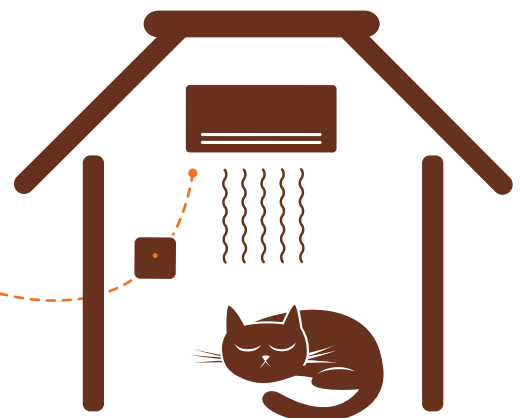

STAY INFORMED

With AirPatrol, it's easy to check the room temperature and humidity from anywhere. It even lets you know when temperature drops too low or rises too high.

EASY TO SET UP

Installation takes just a few minutes and it works with all major heat pumps, air conditioners and smartphones.
