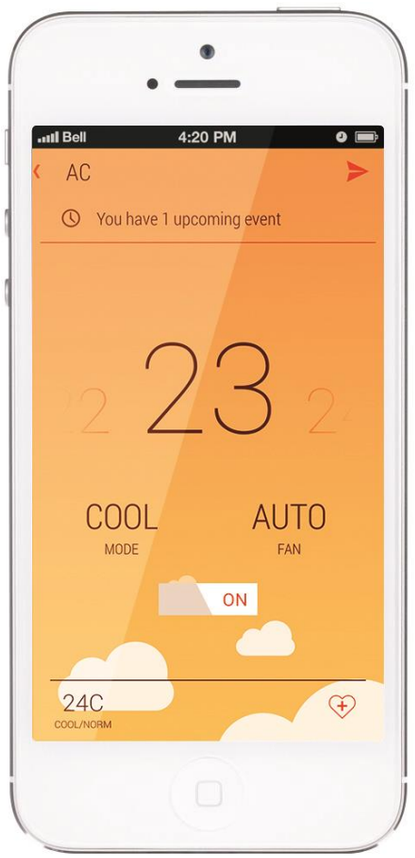
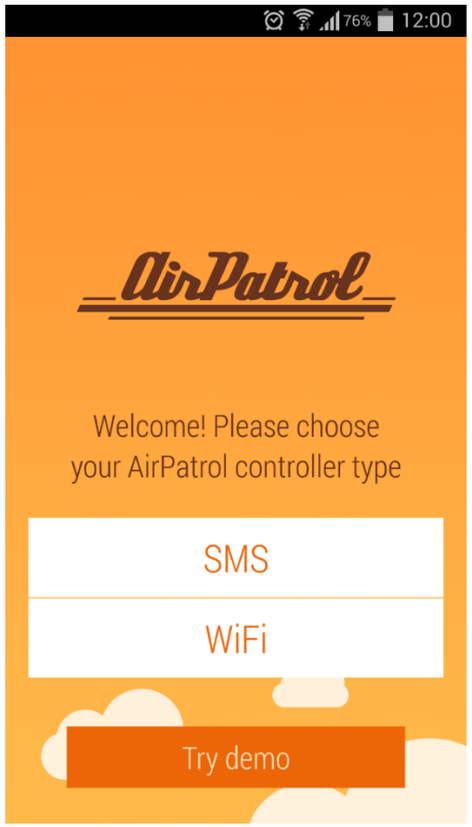
BEST WAY TO USE AIRPATROL

We have made totally new **free mobile application** for iOS and Android!

It has more features than before and easier to use design.

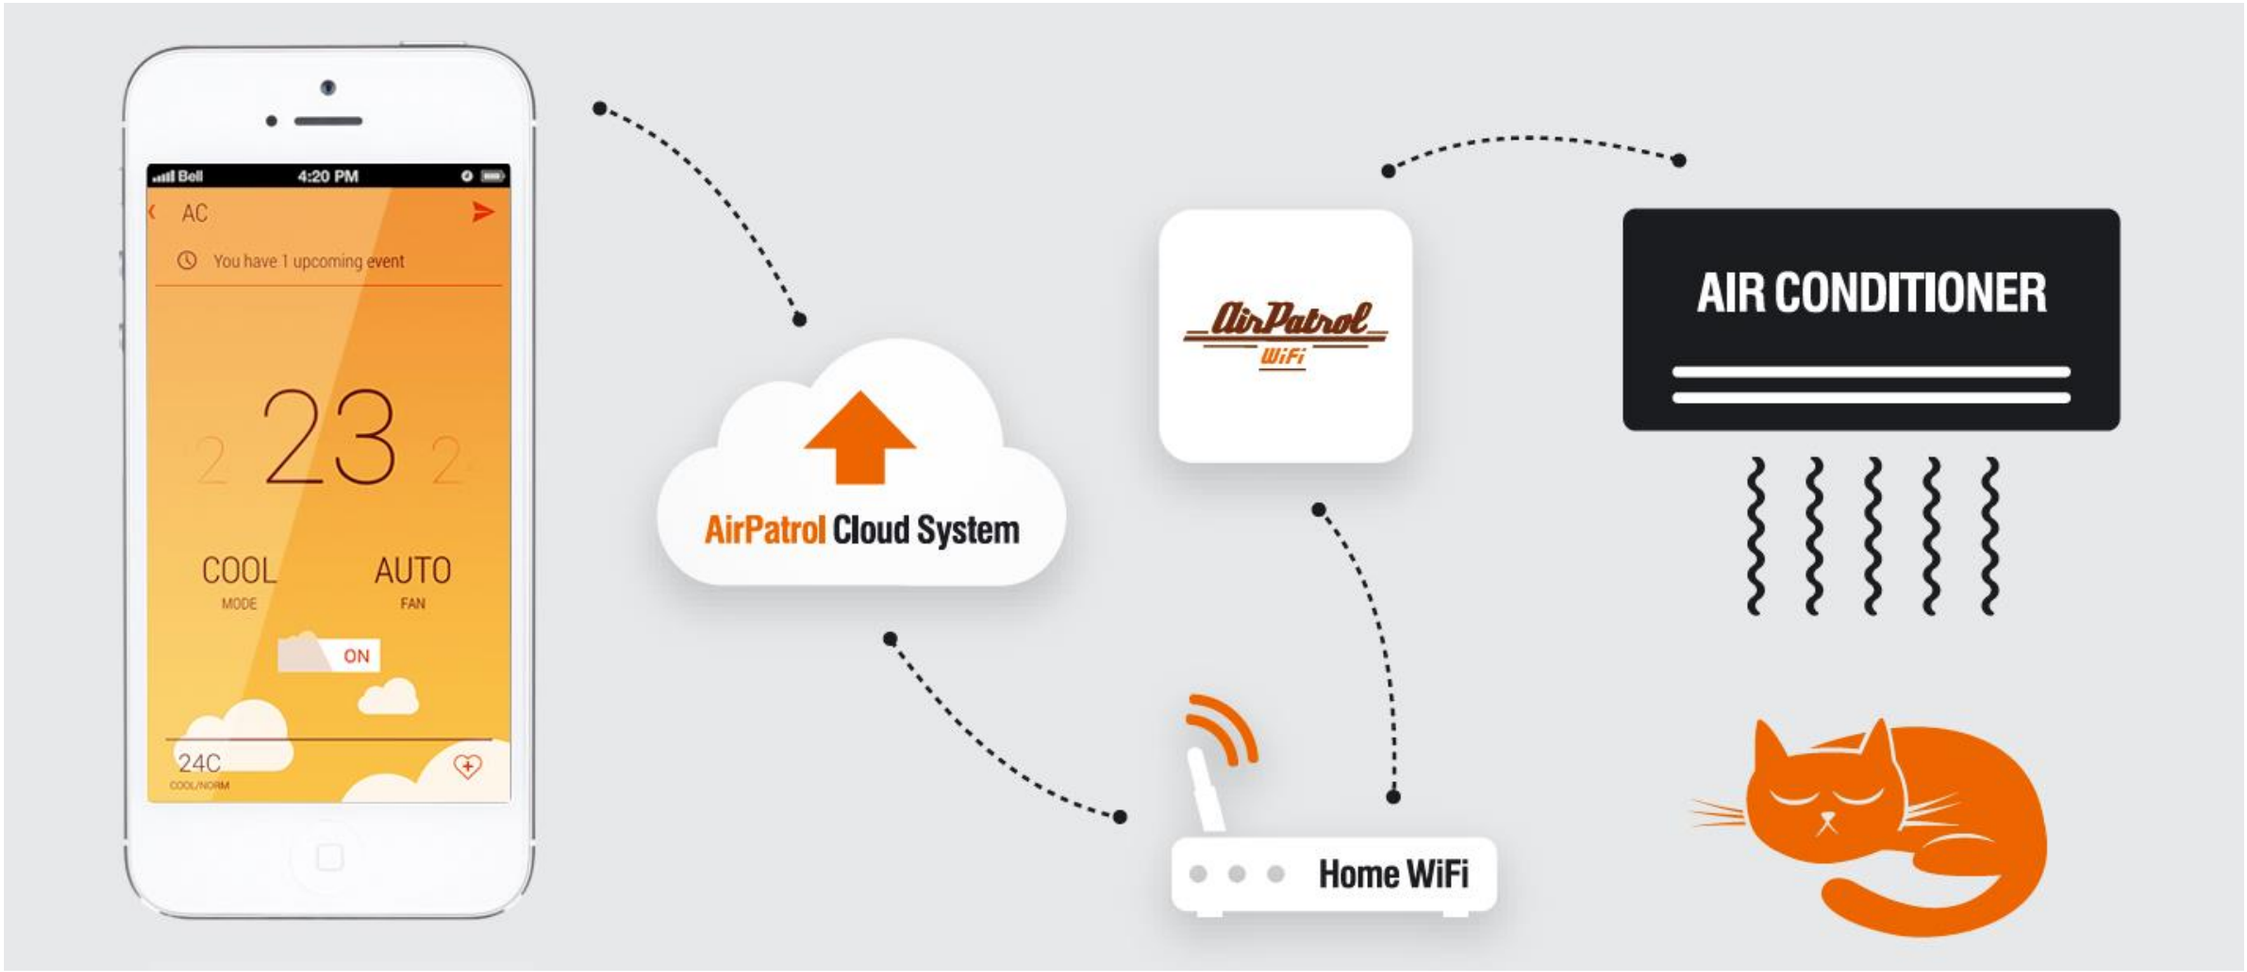
After pluging in AirPatrol WiFi to power socket download the App
and it will guide you through installation process.





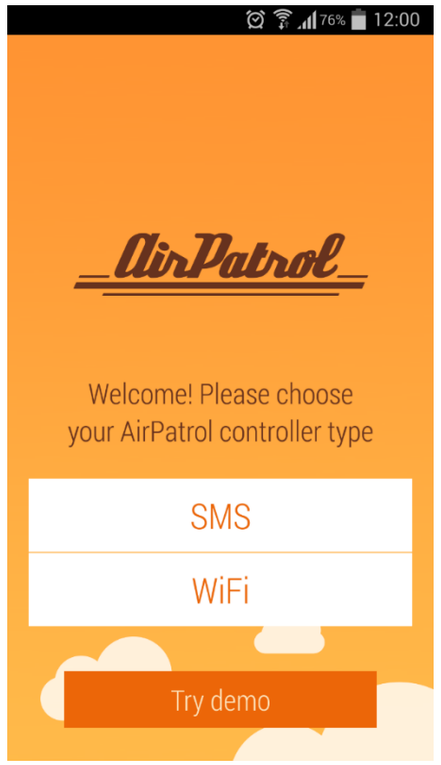
HOW IT WORKS?

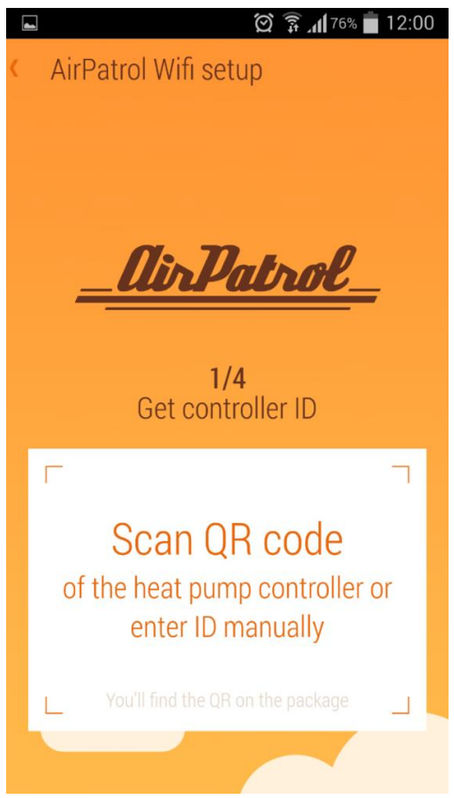
AirPatrol WiFi uses secure wireless channels (WiFi, InfraRed) to transfer your wishes to your AC unit.

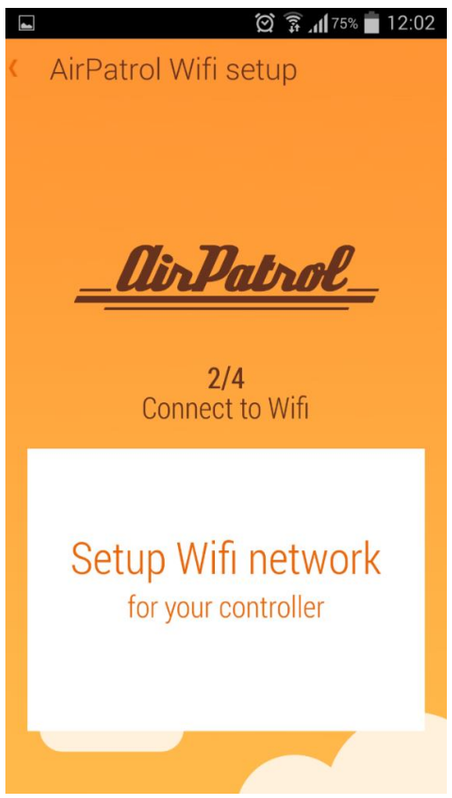


EASY TO SET UP

As always our products are made to be used by anyone which means they have to be really simple to set up and use. We took this task seriously and have managed to shorten the whole set-up process to four simple steps that take a couple of minutes.







AIRPATROL IN GENERAL

AirPatrol is number one **brand** in air-to-air type air conditioning **mobile control** market.

AirPatrol is the best **solution** to control your air conditioner (A/C) or heat pump with mobile phone.

AirPatrol produces wireless, simple to use **mobile controllers** to be used with various air conditioners and heat pumps.

AirPatrol mission is to create customer oriented, easy to use controllers, that:

- help to save energy (=money)
- make life comfortable
- are easy to set up
